

Low Temperature? TF1600 still works fine!

Brochure Download

TF1600, the IP65 fingerprint identification terminal for access control and time management, is specially designed for outdoor application. The cover above the fingerprint sensor protects the sensor from light and dust. Additionally, TF1600 operates well under the temperature that ranges from -40°C to 45°C, which makes it more adaptable to the environment.

Operation Temp.:
-40°C~ 45°C
